

(e) In the event a lot, parcel of real estate or building discharging sanitary sewage, industrial waste, water or other liquids into the City's sanitary sewerage system, either directly or indirectly, is not a user of water supplied by the water utility in the City of Lebanon, and the water used thereon or therein is not measured by a water meter, or is measured by a water meter not acceptable to the City, then the amount of water used shall be otherwise measured or determined by the City. In order to ascertain the rate or charge provided in this ordinance, the owner or other interested party, at his expense, may install and maintain a meter acceptable to the City for said purposes.

(f) In the event a lot, parcel of real estate or building discharging sanitary sanitary sewage, industrial wastes, water or other liquids into the City's sanitary sewerage system, uses water in bottling, manufacturing, or similar processing in excess of the quantity allowed for the applicable minimum charge per month, and it can be shown, to the satisfaction of the City, that the portion of the water used in such processing, as measured by the water meter or meters, does not and cannot enter the sanitary sewerage system, then the City may determine in such manner and by such method as it may deem practicable the percentage of metered water entering the sanitary sewerage system. Such percentage when so determined, shall then constitute the basis of sewerage service charges; provided, however, that the City in its discretion may require or permit the installation of additional meters at the expense of the owner or other interested party in such a manner as to determine the quantity of water actually entering the sanitary sewerage system as so determined.

(g) In order that the rates and charges may be justly and equitably adjusted to the service rendered the City shall have the right to base its charges not only on volume but also on the strength and character of the sewage and wastes which it is required to treat and dispose of. The City shall have the right to measure and determine the strength and content of all sewage and wastes discharged, either directly or indirectly, into the City's sanitary sewerage system, in such manner and by such method as it may deem practicable in the light of the conditions and attending circumstances of the case, in order to determine the proper charge.

Extra charges based on the strength of the sewage and liquid wastes shall be made on the following basis:

For suspended solids in excess of two (2) pounds for each one thousand (1,000) gallons of sewage and wastes, an additional charge of fifteen cents (\$0.15) shall be made for each pound.

For five day biological oxygen demand in excess of one and seventy-five hundredths (1.75) pounds for each one thousand (1,000) gallons of sewage and wastes, an additional charge of fifteen cents (\$0.15) shall be made for each pound.

To determine the strength of the sewage and wastes samplings and analyses may be made from time to time by the City.

The determination of suspended solids and of five day biological oxygen demand contained in the wastes shall be in accordance with the latest copy of "Standard Methods of Water Analysis", as written by the American Public Health Association and the American Waterworks Association.

(h) For the service rendered to the City of Lebanon, said City shall be subject to the same rates and charges hereinabove provided, or to charges and rates established in harmony therewith.

(i) Such rates and charges shall be prepared and billed by the City of Lebanon, and shall be collected in the manner provided by law and ordinance.

(j) The rates and charges may be billed to the tenant or tenants occupying the properties served, unless otherwise requested in writing by the owners, but such billings shall in no wise relieve the owner from liability in the event payment is not made as herein required. The owners of the properties served, which are occupied by tenants, shall have the right to examine the collection records of the City for the purpose of determining whether such rates and charges have been paid by such tenants; provided that such examination shall be made at the office at which said records are kept and during the hours that such office is open for business.

Section 2. These rates and charges shall be extended to and cover any additional premises thereafter served, without the necessity of any hearing or notice.

Section 3. The rates and charges established by this ordinance shall be collected by the City. The Board of Public Works and Safety shall make and enforce such by-laws and regulations as may be deemed necessary for the safe, economical and efficient management of the City's sewage works, including sewer system, pumping stations and sewage disposal plant, for the construction and use of house sewers and connections to the sewerage system, and for the regulation, collection, rebating and refunding of such rates and charges.

Section 4. For the purpose of this ordinance, the terms "sanitary Sewage" and "industrial wastes" shall be defined as follows:

(a) "Sanitary sewage" is hereby defined as the waste from water closets, urinals, lavatories, sinks, bath tubs, showers, household laundries, basement drains, garage floor drains, bars, soda fountains, cuspidors, refrigerator drips, drinking fountains and stable floor drains.

(b) "Industrial wastes" are hereby defined as being the liquid waste resulting from any commercial manufacturing or industrial operation or process.
