

than 78 degrees during operation of cooling equipment and no more than 65 degrees during operation of heating equipment.

7. Greater than minimum work schedules, as for building cleaning and maintenance, restocking, etc., which would require office or industrial facilities to be illuminated, cooled, or heated beyond normal working hours.

8. Nighttime sports and recreational activities.

9. Public museums, art galleries, and historic buildings requiring illumination, cooling or heating.

Any dispensable use shall be provided the minimum amount of electricity to protect and maintain the dispensable use facilities.

6. Emergency Curtailment Without Regard to Priority.

The Utility reserves the right to order electric service curtailment without regard to the priority of service when in its judgment such curtailment is required to forestall imminent and irreparable injury to life, property or the electric system. Curtailment may include interruption of selected circuits. A curtailment pursuant to this Rule shall not exceed 72 consecutive hours without approval of the Public Service Commission of Indiana.

7. Priority of Service

Priority of Service, in the event of mandatory curtailment, shall be as set forth below. The highest priority is Service Priority Class I and the lowest priority of service is Service Priority Class V.

Service Priority Class

- I. Human Needs
- II. Residential and living quarters
- III. Commercial and industrial customers
- IV. Schools, colleges, universities and other educational institutions.
- V. Dispensable Uses and Surplus Capacity Power

8. Mandatory Curtailment Procedure

Curtailment, unless pursuant to 6., shall begin with Service Priority Class V and continue as necessary through Service Priority Classes IV, III, II and I as follows:

1. When the Utility's fuel supply reaches 40 days, public notice, by press release, shall be given to Service Priority Class V customers to fully (100%) curtail such service.

2. When the Utility's fuel supply reaches 40 days, public notice shall be given to (a) Service Priority Class IV to curtail service to a service level of not more than 50% of service obligation or base monthly consumption, whichever is applicable as determined by the Utility, (b) Service Priority Class III to curtail service to a service level of not more than 75% of service obligation or base monthly consumption, whichever is applicable as determined by the Utility.

3. When the Utility's fuel supply reaches 30 days, public notice shall be given to (a) Service Priority Class IV to curtail service fully to a service level that is necessary to protect and maintain Service Priority Class IV facilities, (b) Service Priority Class III to curtail service to a service level of not more than 50% of service obligation or base monthly consumption, whichever is applicable as determined by the Utility, and (c) Service Priority Class II to curtail service to a service level of not more than 75% of service obligation or base monthly consumption, whichever is applicable as determined by the Utility.

4. After Service Priority Classes IV, III and II are curtailed to a level of not more than indicated in subdivision 3 above of service obligation or base monthly consumption, Service Priority Classes IV through II, both inclusive, will be further curtailed by equal percentages until full (100%) curtailment occurs.

5. After Service Priority Classes IV, III and II are in full (100%) curtailment shall commence in service Priority Class I as necessary.

Except as provided in Section 8.1, the Utility will give notice of curtailment in the most effective manner possible and as much in advance as possible with regard to the exigencies and the number of customers to be notified. The curtailment shall be effective as of the time and date specified in the notice.

9. Curtailment by Short Term Service Interruption

In the event mandatory curtailment is imposed, as above provided, the Utility in addition may employ, for not more than two hours' duration at any one time, selective short term service interruptions by operation on a rotational basis of distribution switching equipment to effect the necessary curtailment in one or more Service Priority Classes.

10. Restoration of Service

Service shall be restored in the reverse order of the original curtailment.

11. Penalty for Noncompliance

Customers failing to comply with the specified curtailment for more than 7 days will be subject to disconnection for the duration of the emergency. Energy use by Industrial and Large Commercial customers in excess of that permitted under curtailment shall be subject to a 10 cent per KWH penalty, in addition to normal billing charges, for all electric energy taken in excess of mandatory curtailment limitations. Penalty charges collected hereunder shall be segregated in a separate account, and shall be applied to reduce the fuel cost adjustment charges of Industrial and Large Commercial customers who, during the existence of a fuel emergency, have not used electric energy in excess of mandatory curtailment limitations.

12. Applicability

The terms and provisions of this Rule shall control notwithstanding any terms and provisions of rate schedules, General Rules and Regulations of the Utility or any contract or agreement between the Utility and any Customer to the contrary.

ORDINANCE #78-6

WHEREAS, it has been determined that it is now necessary to appropriate more money than was appropriated in the annual budget; now, therefore:

Section 1. Be it ordained by the Common Council of the City of Lebanon, Boone County,
