

shall, on a form provided by the Board, report the existence of such well to the Clerk-Treasurer. The information furnished on such form by the owner or occupant shall include, among other items, the name of the owner and occupant of such real estate, the location on said real estate of such well, the size of the well pipe, the size (voltage, amperage and horsepower where ascertainable) of the well pump motor, and the purpose for which the well water is used by the owner, occupant or others.

### 3.2 Inspection of Wells

The Board may direct the superintendent, inspector or any other employee to enter upon private property for the purpose of inspecting to determine the existence of private wells, to oversee or to direct the installation of metering or timing devices, and to read such meters and devices.

### 3.3 Well Digging

A person shall not hereafter dig or drive a well within the City limits without first making application therefor to the City Building Department, which application shall be on a form approved by the Board and showing all pertinent data regarding size and flow. The application shall be signed by both the installer of the well (the contractor or other person doing the work) and the owner or his agent (other than the installer). The failure to file such an application shall be a violation of this ordinance.

## ARTICLE IV WASTEWATER ADMISSIBILITY

### 4.1 Major Contributor Permits

Any industrial user and any other user on demand of the Board shall provide the City with sufficient information to determine if he is a major contributor. Any user determined to be a major contributor shall be required to obtain a permit which describes the wastewater constituents and characteristics allowed and which sets forth the applicable surveillance schedule and the monitoring requirements the user shall be subject to in order to discharge into the sewerage system. A major contributor permit shall be valid for four (4) years unless processing changes are made that, in the opinion of the Superintendent or Board, alter the wastewater constituents and characteristics significantly. In the event of such a change, a new application shall be filed accordingly. A permit may be renewed without reapplication at the end of four (4) years at the discretion of the City.

Nothing in a major contributor permit shall constitute an exception to the prohibitions and limitations on wastewater admissibility as set forth herein. Major contributors are subject to all applicable fees, rates, and charges set forth in Article V of this ordinance.

### 4.2 Major Contributor Permit Applications; Fees

Major contributors shall make application for the proposed discharge on a form provided by the City. The permit application shall be supplemented by any plans, specifications, studies or other information considered pertinent by the Board.

#### 4.2.1 Fees

Permit fees for major contributors shall be as follows:

	<u>Permit Fee</u>
Initial Major Contributor Permit	
Industries connected to sewerage works prior to the effective date of this ordinance	\$ 20.00
Industries connected to sewerage works after the effective date of this ordinance	\$100.00

### 4.3 Surveillance of Major Contributors

To establish a feasible surveillance schedule, the following classes of major contributors are formed:

<u>Class</u>	<u>Qualifications</u>	<u>Minimum Surveillance Schedule</u>
A	Flow of one hundred thousand (100,000) gallons per day (0.1 MGD) and greater per average workday	Quarterly
B	Flow from 0.05 MGD to 0.1 MGD per average workday or discharge with constituents or characteristics that result in a major contributor classification	Semiannually

The surveillance period will normally be for a period of seven (7) consecutive days, but can be of longer or shorter duration at the discretion of the Board or Superintendent. In cases where the surveillance period extends for a greater number of consecutive days than seven(7), the City shall have the prerogative of selecting the seven (7) consecutive days of its choice for establishing rates and charges as provided for in Article V of this ordinance.

#### 4.3.1 Surveillance Survey Charge

The charge for each surveillance survey shall be \$20.00 per day with a maximum charge for seven (7) days of \$40.00.

### 4.4 Monitoring of Major Contributors

A major contributor shall install at its own expense (a) a suitable control manhole, together with such necessary appurtenances in or on each building lateral sewer to facilitate observation, sampling and measurement of the wastewater, and (b) such sampling devices as may be reasonably necessary, all unless otherwise instructed by the City. A user may be required by the City to install such manholes to verify his status either as a major contributor or otherwise. Such manholes and sampling and testing devices shall be constructed and maintained to the City's satisfaction at the expense of the user, but shall be under the control of the City.

The City may provide monitoring equipment during a surveillance period for control manholes.

Monitoring equipment shall, unless otherwise specified by the City, include a device for automatically measuring flow and a device for automatically taking a composite sample of wastewater during a twenty-four hour period.
