

(b) For users of the sewage works that are unmetered water users or where accurate meter readings are not available, the monthly charge shall be estimated and determined by means and methods satisfactory to the City. Unmetered non"Residential Single Family Dwelling Units" shall be charged a rate to be determined by the City on an individual basis by applying the above metered rates to estimated usage and meter size.

(c) Where a metered water supply is used for fire protection as well as for other uses, the City may, in its discretion, make adjustments in the minimum charge and in the use charge as may be equitable.

(d) For the service rendered to the City of Lebanon, said City shall be subject to the same rates and charges hereinabove provided, or to charges and rates established in harmony therewith.

(e) In order to recover the cost of monitoring industrial wastes, the City shall charge the user the actual cost of analysis as incurred by the City.

(f) In the event two (2) or more residential lots, parcels of real estate, or building discharging sanitary sewage, water or other liquids into the City's sewage system either directly or indirectly, are users or water and the quantity of water is measured by a single water meter, then of the sewage rates and charges shall be multiplied by the number of residential lots, parcels of real estate, or buildings served through the single water meter and added to treatment flow charge determined by the treatment flow rate as applied to the monthly metered flow.

(g) The user charges and debt service charges set forth in the rate structure hereinbefore set forth shall be changed, as necessary, annually by the Common Council in accordance with Section 1(y).

Section 4. The quantity of water discharged into the sanitary sewage system and obtained from sources other than the utility that serves the City shall be determined by the City in such a manner as the City shall reasonably elect, and its sewage service shall be billed at the above appropriate rates; except, as is hereinafter provided in this section, the City may make proper allowances in determining the sewage bill for quantities of water shown in the records to be consumed, and which are also shown to the satisfaction of the City that such quantities do not enter the sanitary sewer system.

(a) In the event a lot, parcel of real estate or building discharging sanitary sewage, industrial wastes, water or other liquids into the City's sewage system, either directly or indirectly, is not a user of water supplied by the water utility serving the City and the water used thereon or therein is not measured by a water meter, or is measured by a water meter not acceptable to the City, then the amount of water used shall be otherwise measured or determined by the City. In order to ascertain the rate or charge provided in this ordinance, the owner or other interested party shall, at his expense, install and maintain meters, weirs, or volumetric measuring acceptable to the City for the determining of sewage discharge.

(b) In the event a lot, parcel of real estate or building discharging sanitary sewage, industrial wastes, water or other liquids into the City's sanitary sewerage system, either directly or indirectly, is a user of water supplied by the water utility serving the City, and in addition, is a user of water from another source which is not measured by a water meter or is measured by a meter not acceptable to the City, then the amount of water used shall be otherwise measured or determined by the City. In order to ascertain the rates or charges, the owner or other interested party shall, at his expense, install and maintain meters, weirs, or volumetric measuring acceptable to the City for the determination of sewage discharge.

(d) In the event a lot, parcel of real estate or building discharges sanitary sewage, industrial wastes, water or other liquids into the City's Sanitary sewerage system, either directly or indirectly, and uses water in excess of 2500 cubic feet per month, and it can be shown to the satisfaction of the City that a portion of water as measured by the water meter or meters does not and cannot enter the sanitary sewage system, then the owner or other interested party shall at his expense, install and maintain meters, weirs, volumetric measuring devices or any adequate and approved method of measurement acceptable to the City for the determination of sewage discharge.

Section 5. In order that the rates and charges may be justly and equitably adjusted to the service rendered to users, the City shall base its charges not only on the volume, but also on strength and character of the stronger-than-normal domestic sewage and shall require the user to determine the strength and content of all sewage and wastes discharged, either directly or indirectly into the sewage system, in such manner and by such method as the City may deem practical in light of the conditions and attending circumstances of the case, in order to determine the proper charge. The user shall furnish a control manhole suitably located and available to the City at all times.

(a) Normal sewage domestic waste strength should not exceed a total biochemical oxygen demand of 210 milligrams per liter of fluid, or total suspended solids in excess of 240 milligrams per liter of fluid, or ammonia nitrogen (NH<sub>3</sub>N) in excess of 20 milligrams per liter of fluid. Additional charges for treating stronger-than-normal domestic waste shall be made on the following basis:

(1) Rate Surcharge Based Upon TBOD

There shall be an additional charge of 17.0 cents per pound of total biochemical oxygen demand for TBOD received in excess of 210 milligrams per liter of fluid.

(2) Rate Surcharge Based Upon Total Suspended Solids

There shall be an additional charge of 17.0 cents per pound of total suspended solids for total suspended solids received in excess of 240 milligrams per liter of fluid.

(3) Rate Surcharge Based Upon Ammonia Nitrogen (NH<sub>3</sub>N)
